GO−BP enrichment — 6−PP_vs_Control_GLOBAL
circadian rhythm
rhythmic process
response to ethylene
ethylene−activated signaling pathway
cellular response to ethylene stimulus
post−embryonic development
phosphorelay signal transduction system
response to light stimulus
response to radiation
photomorphogenesis
regulation of circadian rhythm
hormone−mediated signaling pathway
cellular response to hormone stimulus
cellular response to endogenous stimulus
response to abiotic stimulus
cellular response to chemical stimulus
regulation of post−embryonic development
regulation of multicellular organismal development
response to hormone
response to endogenous stimulus
