GO−BP enrichment — 6−PP_vs_Control_within_Drought_DuringDrought
response to light stimulus
response to radiation
circadian rhythm
rhythmic process
response to abiotic stimulus
post−embryonic development
photomorphogenesis
regulation of circadian rhythm
response to red or far red light
glutamine family amino acid metabolic process
glutamine family amino acid catabolic process
multicellular organism development
glutamate metabolic process
polyamine biosynthetic process
photoperiodism
cellular response to light stimulus
multicellular organismal process
polyamine metabolic process
cellular response to abiotic stimulus
cellular response to radiation
