C

6−PP vs Control during drought

protein GIGANTEA

CBL−interacting protein kinase 10−like

cyclic dof factor 2−like

protein REVEILLE 7−like

uncharacterized LOC127302986

cyclic dof factor 2−like

histone H4−like

protein LURP−one−related 8−like

$-\log_{10}$ adjusted P

$\log_2$ fold change

Significance

Downregulated

Not significant

Upregulated

D

6−PP vs Control post drought

adagio−like protein 3

protein REVEILLE 7−like

CBL−interacting protein kinase 10−like

nodulin−related protein 2−like

ubiquitin−conjugating enzyme E2 7

uncharacterized LOC127317505

RNA−binding motif protein 25

calcium−binding protein KIC−like

$-\log_{10}$ adjusted P

$\log_2$ fold change

Significance

Downregulated

Not significant

Upregulated

E

GO enrichment during drought

response to light stimulus

response to radiation

circadian rhythm

rhythmic process

response to abiotic stimulus

post−embryonic development

photomorphogenesis

regulation of circadian rhythm

response to red or far red light

glutamine family amino acid metabolic process
